please install the product manually. Scroll down for the instructions.

# Windows

Install camera profiles and presets manually.  
Scroll down for the instructions.

# How to install the product manually?

The installation process for Mac or Windows PC takes a few minutes and consists of the following steps:

1. Install RNI Camera Profiles – **!!! THIS STEP IS IMPORTANT AND REQUIRED !!!**
2. Install Lightroom Presets
3. Install Photoshop ACR Presets

Please see below for the detailed instructions.

# 1. Install RNI Camera Profiles (on MAC)

Copy the folders containing RNI Camera Profiles to the following location:

*User / Library / Application Support / Adobe / Camera Raw / Camera Profiles* \*

\* To locate your *User / Library* folder hold down the Option key and select Library from the Go menu in Finder

# 1. Install RNI Camera Profiles (on Windows)

Copy the folders containing RNI Camera Profiles to the following location:

*Windows XP:*

*C: \ Documents and Settings \ User \ Application Data \ Adobe \ CameraRaw \ CameraProfiles*

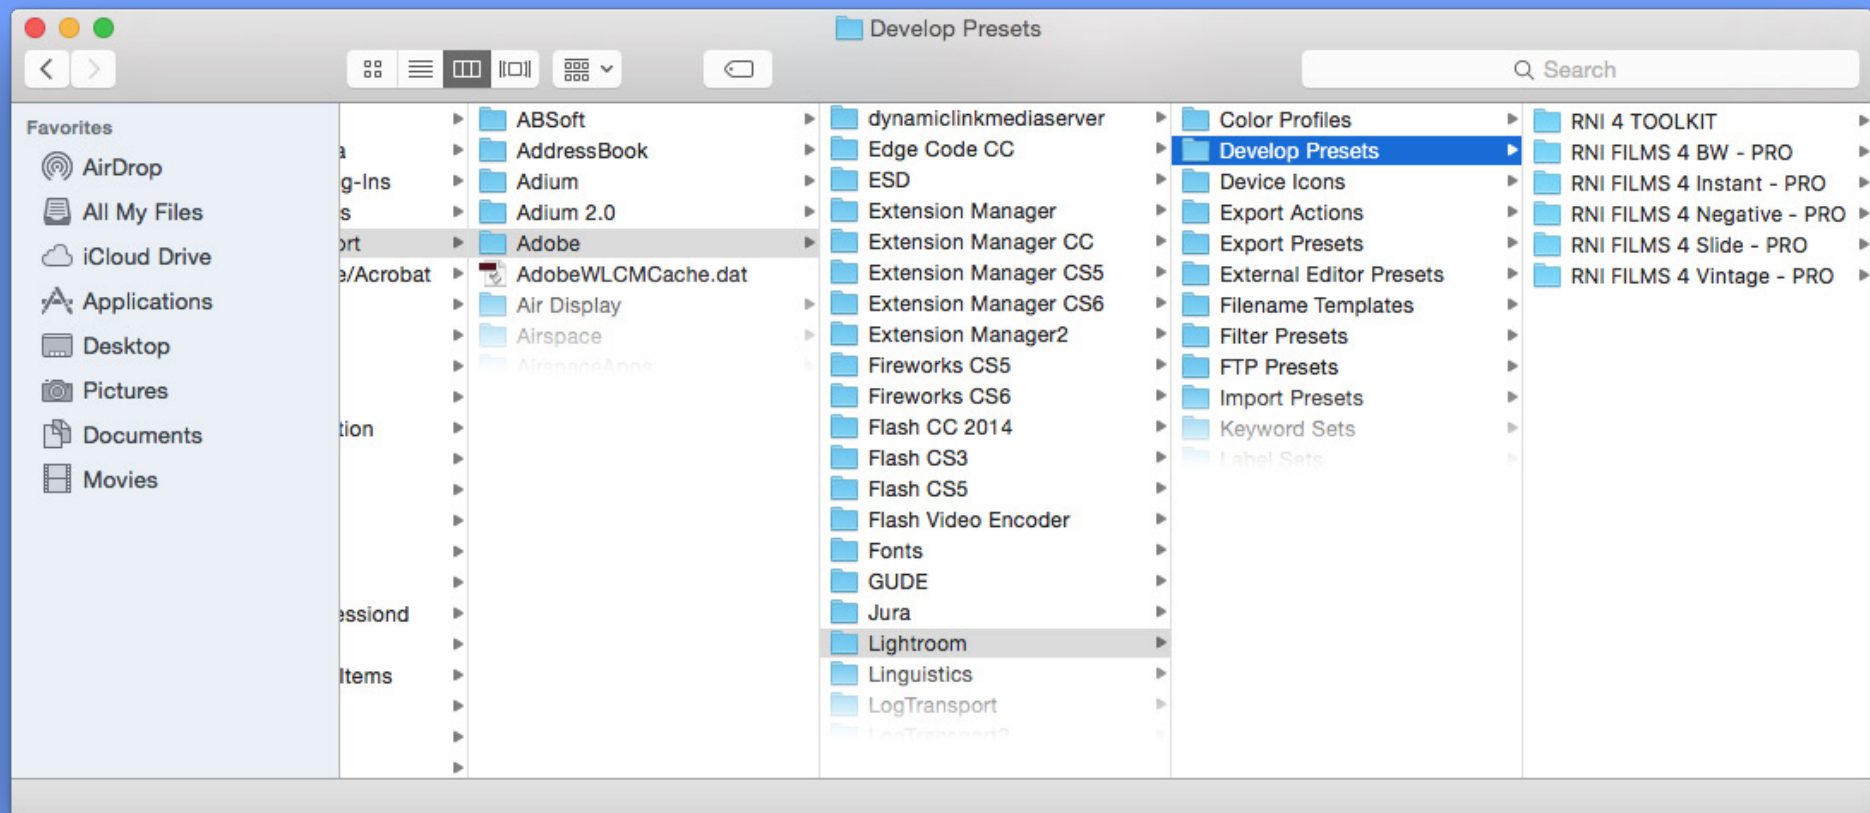

*Windows 7, 10 and after:*

*C: \ Users \ User \ App Data \ Roaming \ Adobe \ CameraRaw \ CameraProfiles*

## 2. Install Lightroom Presets (MAC / Win)

1. Launch Adobe Lightroom.
2. Open Preferences / Presets and click 'Show Lightroom Presets Folder'.
3. Copy the RNI presets folders (preserving folder structure) into your Lightroom *Develop Presets* folder.
4. Restart Lightroom to activate the new presets.

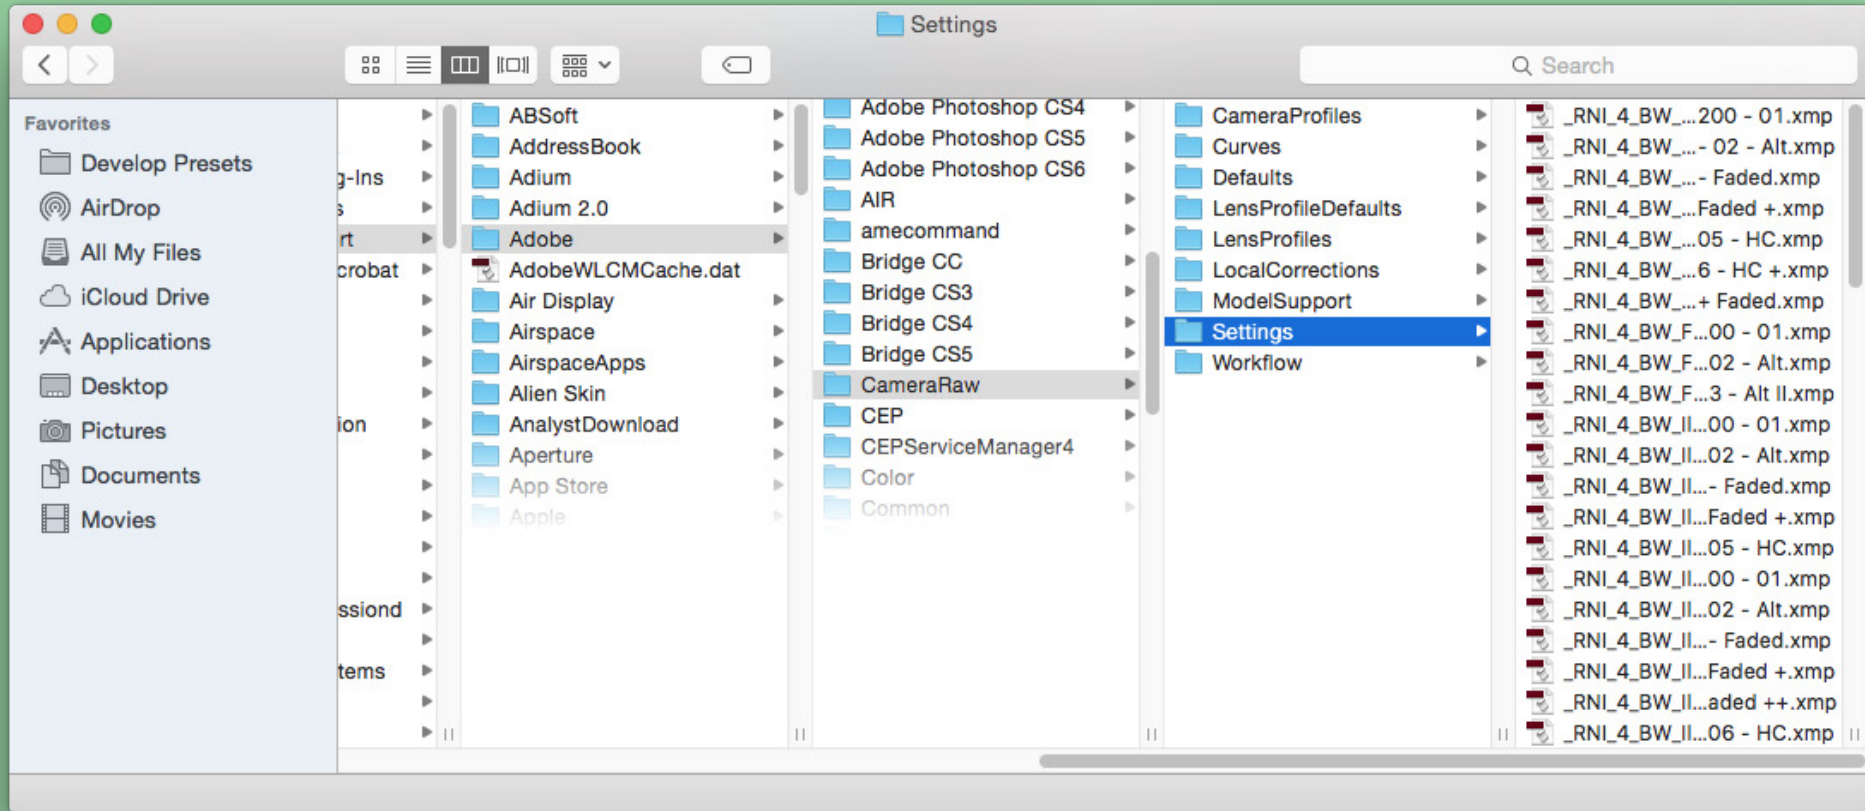

# 3. Install Photoshop ACR Presets (on MAC)

Copy the contents of the RNI ACR folder (just .xmp files) to this location:

*User / Library / Application Support / Adobe / Camera Raw / Settings \**

Restart Adobe Photoshop to activate the new presets.

\* To locate your *User / Library* folder hold down the Option key and select Library from the Go menu in Finder

Enjoy!
