

RNI Film Presets for Lightroom CC & Photoshop ACR CC
How to Install
Step by step guide

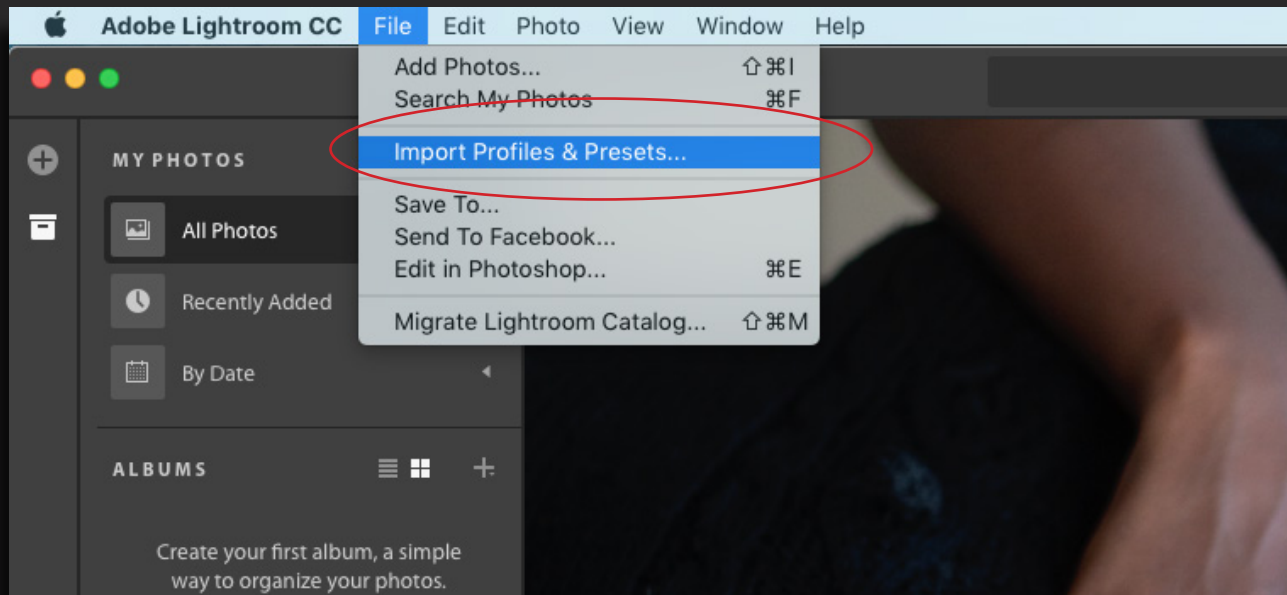

Lightroom CC

Lightroom CC

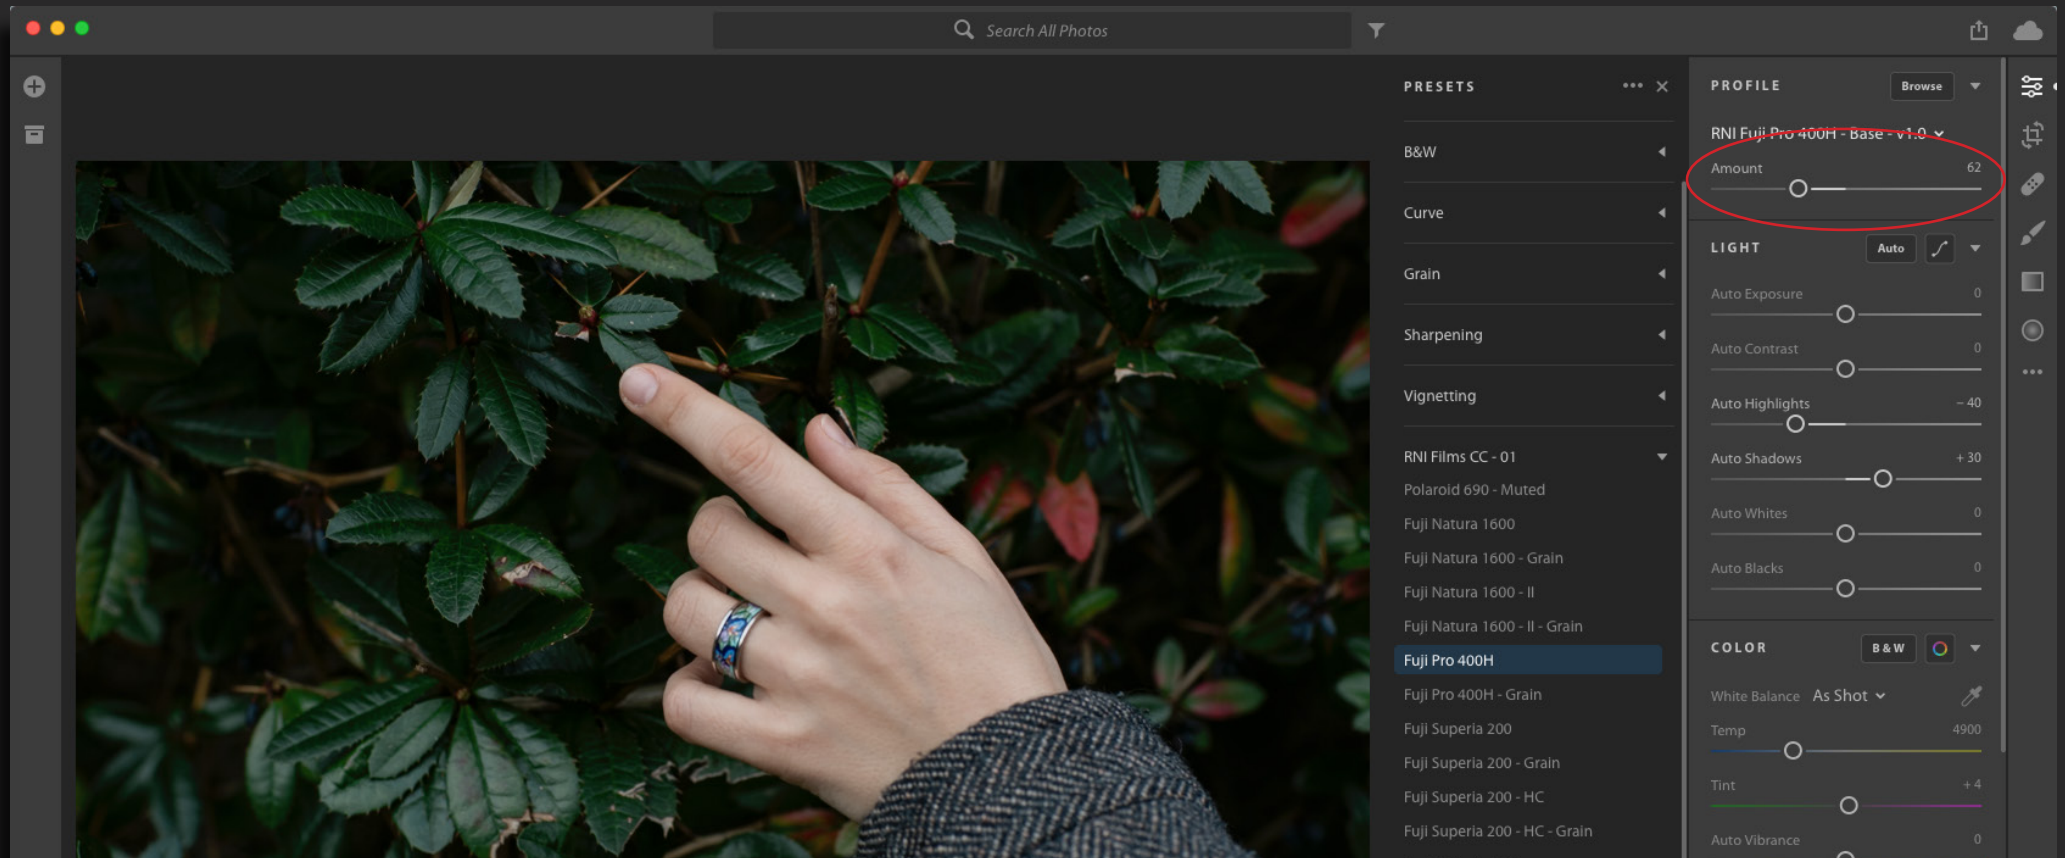

Import RNI Profiles and Presets using the built-in import functionality.
Then restart Lightroom to activate new profiles and presets.

Lightroom CC

Now you can apply presets and then adjust film strength using the profile Amount slider

Lightroom CC Classic / Photoshop ACR

Mac

Simply run the installation package,
and it will install everything for you

If something goes wrong with the automatic installation,
please install the product manually. Scroll down for the instructions.

Windows

Install camera profiles and presets manually.
Scroll down for the instructions.

Manual installation on Windows

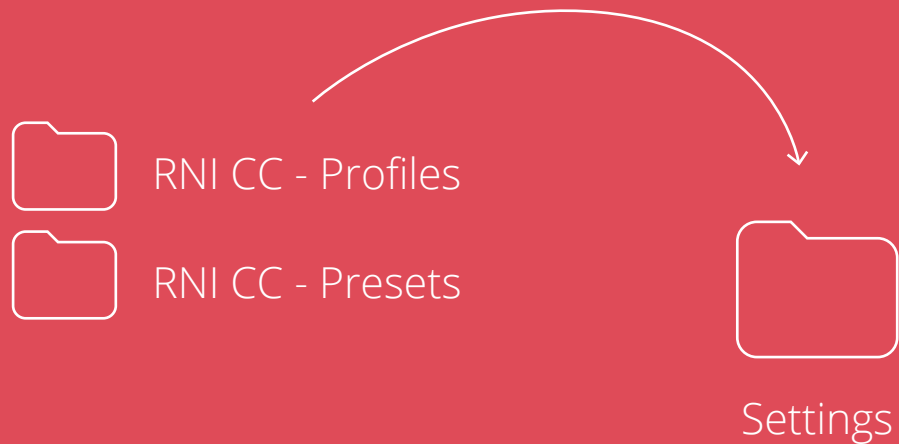

Copy the folders containing RNI Film Profiles and presets to the following location:

Windows XP:

C: \ Documents and Settings \ User \ Application Data \ Adobe \ CameraRaw \ Settings

Windows 7, 10 and after:

C: \ Users \ User \ App Data \ Roaming \ Adobe \ CameraRaw \ Settings

Enjoy!
